# Tactile & Braille

3 mm non-glare acrylic face plate, back painted.

2 mm non-glare acrylic graphic patch, reverse applied black vinyl text, back painted accent colour with black applique tactile number and clear acrylic dot Braille.

9" x 12" 2 mm non-glare acrylic face plate with reverse applied black vinyl graphics, routed out thumb notch and back painted white border, foam taped to 2 mm white styrene to create pocket for message.

2 mm non-glare acrylic graphic patch, back painted accent colour with white applique tactile number and clear acrylic dot Braille.

2 mm non-glare acrylic face plate, back painted, mounted to 1.5mm non-glare acrylic, tape mounted to Sintra back plate to create pocket for insert.

Black tactile lettering and number and routed out Braille.

8" x 8" x 1/16" engraving laminate with white applique tactile graphics to indicate level and handicap refuge area. The smaller text on the gold is engraved on the reverse side for a clean smooth finish; on the black, the smaller text, logo and border are engraved on the front, giving more texture to the sign.

Economical and attractive, these are ideal solutions for meeting occupancy code requirements.
